

YOUR CCC TECHNOLOGY RESOURCE CONNECTION

Our CETC Ambassador will be the influential and knowledgeable advocate and primary on-campus resource who will consistently promote systemwide CETC services at our California Community College campuses.

@ONE

TARGET AUDIENCE:

- Faculty
- Staff
- Administrators
- IT Professionals

HISTORY:

The project was created in 1998 to provide support for the growing use of technology in the classroom and has expanded to support technology infrastructure.

DESCRIPTION:

The @ONE Project provides technology training, support, and online resources to California Community College faculty, staff and IT professionals in order to enhance student learning and success.

Trainings offered in:

- Fundamental Technical Skills
- Multimedia Applications
- Online Teaching
- Technical Topics
- Technology-Enhanced Instruction

SERVICES/PRODUCTS:

- Hands-On Institutes
- Distance Education
- @ONE Knowledge Center
- Online Teaching Conference

@ONE Hands-On Institutes: Provide face to face technology training tailored to the uses of technology in California Community Colleges. Each multiday workshop is taught by expert faculty, offers you a chance to apply concepts directly to your own work, and encourages you to share experiences with your peers from throughout the state.

Distance Education: @ONE offers training using distance education technologies on a wide variety of topics tailored to the busy schedules of both faculty and staff. These include seminars that you can take over your lunch break (Desktop Seminars and Video Broadcasts) or in your spare time over the course of several weeks (Online Courses).

@ONE Knowledge Center: Contains a set of online resources that faculty and staff can use to supplement their training on technology related issues. The Knowledge Base contains self-paced courses, print curriculum, and other resources.

Online Teaching Conference: The annual Online Teaching Conference is a two-day conference focused on excellence in distance education. Featuring presentations by leaders in online education, the conference also features new technologies and methods used to improve quality in distance education.

BENEFITS:

Hands-On Institutes provide participants the opportunity to learn new skills and apply those skills to real-world projects from their office or classroom. There are topics for all CCC employees – from introductory computer users to advanced technology experts.

Distance Education: These courses allow faculty, staff, and IT professionals the ability to learn about technology while meeting the demands of their busy schedules.

@ONE Knowledge Center contains on-demand technology training resources to improve skills in a number of technology areas.

Online Teaching Conference: Learn from leaders in online education, while catching up with the latest technologies and methods used to improve quality in distance education.
